JOIN US

It is time to toss our seed pellets! Join us!

We will fling native seed pellets created early this year into the desert of Maricopa County's regional parks. The initiative to spread native seeds is a proactive step towards ecological restoration. These native seeds are selected for their resilience and ability to thrive in the local environment.

To learn more about the Parks Desert Defender Program, visit <https://www.maricopacountyparks.net/about-us/desert-defenders/>.

Please bring work gloves, water, and a snack. Wear a long-sleeved shirt, pants, and closed-toed shoes. This activity requires hiking along nature trails.

We encourage family participation; however, parents must be present for minors, and it is recommended that participants be at least five years of age.

Note: If fewer than two people register for each event, we reserve the right to cancel at least one day before. If canceled, email notifications will go to the registrants.
